Clinical Research Coordinator

LEVEL 2

Programme

DURATION

6 Days over 3 weeks
Thursday and Fridays

COURSE FEES

Full Price	**S$3885** *(inclusive of GST)*
Subsidized Fees *(Only applicable to CRCs from Singapore's Public Healthcare Clusters under MOH Holdings)*	**S$430** *(inclusive of GST)*

Investigator-Initiated Trials (IIT) Made Easy for CRC

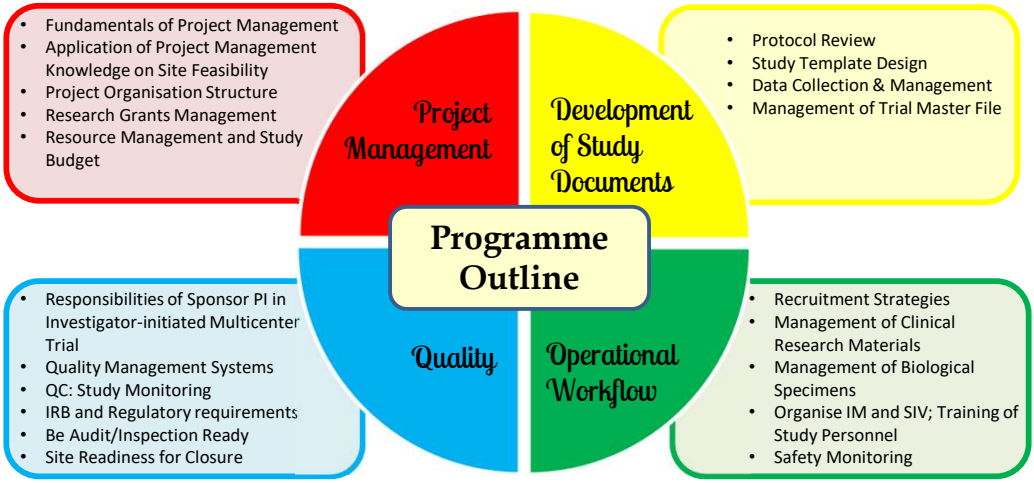
"If **you fail to plan**, **you** are **planning to fail**!"
- *Benjamin Franklin.*

Conducting an investigator-initiated trial requires a lot of planning and coordination.

In this programme, you learn about the key fundamental project management concepts and tools that are commonly used in clinical research studies, and acquire the ability to coordinate investigator-initiated clinical research studies with a reasonable degree of proficiency. Applications will be reinforced through interactive classroom discussions, case scenarios and practice-based activities.

WHAT YOU'LL LEARN

- Apply project management concepts from site feasibility stage to completion of a study, which includes resources management, track project status and managing quality issues
- Develop study documents such as data collection tools
- Manage research materials, biological specimens and site logistic matters
- Implement the operational workflow and quality systems for the research study
- Explain the IRB and regulatory requirements, and responsibilities for sponsors in an IIT
- Develop the ability to anticipate and mitigate potential risks or non-compliance
- Highlight key concepts for preparing and conducting a study monitoring



Who Should Attend

- Senior CRCs
- CRC with job responsibilities equivalent of a Senior CRC
- CRC who is progressing towards Senior CRC job grade

Entry Requirements

All requirements must be met:

- At least 4 years of experience in coordinating clinical research studies
- Has experience in participant recruitment, obtaining informed consent, participant visit follow up, IRB submissions, source documentation, maintenance of essential documents, safety reporting and management of investigational product.

Application Procedure

To register for the CRC Level 2 Programme, applicants and their supervisors must complete the following electronic forms.

REGISTRATION PERIOD:

1 February to 1 March

Applicant's Form

Supervisor / Reporting Officer Form

Registration priority will be given to CRCs core-funded under the NMRC CRC programme, and CRCs from Singapore's public healthcare institutes under MOH Holdings.

Testimonials

The six-day Clinical Research Coordinators (CRC) Level 2 programme involves many experienced speakers. I really like the classroom discussions and group activities as I gained new knowledge and insights on project execution and management. The programme is a great platform for me to get to know other peers from other healthcare institutions. Through daily practice-based activities, we also get to share our diverse knowledge and experiences with one another. I strongly recommend all eligible CRCs to enroll in this course, for you will gain very useful knowledge and skills!" **Trish Koon (Clinical Research Coordinator, Division of Obstetrics and Gynaecology, KK Women's and Children's Hospital)**

"The SCRI CRC Level 2 Programme instructors were interactive, and they facilitated the programme interestingly through the classroom and case scenario discussion. From the programme, it has motivated me to think in-depth in strengthening my project management skills and coordination. I believe I am able to apply the appropriate knowledge in my course of work."
Su Jialei (Senior Research Nurse, Khoo Teck Puat Hospital)

SCRI CRC Level 2 programme covers a wide range of topics which gives a comprehensive overview of what the expected responsibilities, knowledge and skill sets are required for a senior CRC. The intensive programme also covers a wide range of content and in-class exercises. The instructors are knowledgeable and engaging and sharing of their experiences helps novice senior CRCs like myself connect new knowledge and processes learnt with my everyday work tasks.
Wong Cher Yi (Clinical Research Coordinator, NUHCS)
